SKU: 617830

£1,228.60 ex VAT

Stock: Available to Order (3-5 Days) Ordered in and delivered within 3-5 days.

The 3M Speedglas Heavy-Duty Welding Helmet G5-01 is created to be adaptable to an individual's needs and situation. The new 3M Speedglas Heavy-Duty Welding Helmet G5-01 has more adjustable features than ever: from the colour as seen through the welding filter to the direction of the airflow and the level of coverage. Supplied with Heavy Duty battery as standard.

Natural Color Technology:

Both of the new G5-01 auto-darkening welding filters (ADFs) feature the popular 3M Speedglas Natural Color Technology for more realistic colour in the light state. And the G5-01VC (Variable Color) model lets users select a warm, standard, or cool colour preference.

Adjustable air flow:

With the helmet's new duct system, users can direct the airflow to either their face or visor, as well as the amount of air coming from the top outlet vs. the two side outlets. With greater control over personalized settings, users can balance the airflow's cooling effect while minimizing flows that might dry out their nose or eyes.

Comfortable and protective:

Designed for heavy-duty, high amperage welding and grinding, the flip-up G5-01 welding helmet connects to the 3M™ Adflo™ Powered Unit

- Speedglas welding filter G5-01VC: variable dark shade 5, 8-14 and variable dark state colours (for shades 8-14). For most types of arc welding
- The big (104 x 170 mm), the clear protective visor is curved, with excellent views up, down, and peripherally.
- Natural Color technology makes the filter view seems lighter, more detailed and colourful. Auto-ON/OFF.
- For more control over your comfort, the innovative G5-01 helmet duct system lets you direct the airflow to either your face, visor, or somewhere in-between.
- Re-configure your helmet using our many additional accessories to just the right coverage for your head, neck, and shoulders.
- With the right type of filter, the Adflo system effectively protects you against both particles and gases - all

in one system

- The slim profile and ergonomic design make it even more lightweight and easier to go into tight welding spaces.
- The G5-01 ADFs are Bluetooth enabled: with the 3M Connected Equipment app, users get access to additional functionalities, statistics, and documentation.
