The Igenix Catering Urn is the ideal solution for serving a large number of hot drinks at one time, it's great to use at home when you're throwing a garden party or BBQ; at the Office for tea breaks; or at commercial events such as School Fairs and Village or Church Hall functions. The urn is very robust, with durable stainless steel construction and has a concealed heating element for easy cleaning. It has an energy saving thermostat ranging from 30 - 100 °C plus a keep warm function. It also features a non-drip tap and water level indicator so you can view how much water is remaining in the tank at any time. Safety features include a locking lid with cool to touch handles, built-in fuse protection and an automatic and manual resettable thermostat.
