The JSP BMN990-001-700 PressToCheck™ are P3 R D Filters with innovative technology that will allow you to check you have the correct seal on your mask every time.

When you have donned your mask, simply press the front and back of both filter covers together to stop air entering through the filters and inhale.

If air is coming through the mask, readjust and repeat the process until no air comes through.

The PressToCheck™ system will guarantee safety each time you wear a respirator mask.

These P3 R D filters provide respiratory protection against very fine dusts, fibres, fumes and liquid aerosols.
