

OPTREL PANORAMAXX QUATTRO PAPR WELDING HELMET

SKU: OPPQPH

£475.00 ex VAT

Stock: Available to Order (3-5 Days) Ordered in and delivered within 3-5 days.

The Optrel Panoramaxx Quattro PAPR ADF welding helmet achieves a perfect rating of 1/1/1/1 in the four categories contained within the critical EN379 standard for Auto-Darkening Filters: Optical class, Scattered light, Homogeneity and Angular dependence. Developed for industrial applications such as heavy construction and vessels, the level 1 angular dependence rating allows the operator to see the welding area without distortion and in perfect clarity, regardless of the welder's position and viewing angle. Designed to be paired with the Optrel E3000X PAPR TH3P system, offering the highest levels of protection against fine dust, fumes, mist and spores as well as ozone odours, acidic gases, organic and inorganic vapours when fitted with the optional A1B1E1 filter.

EN379 classification:

- Optical class: 1
- Scattered light: 1
- Homogeneity: 1
- Angular dependence: 1

Shade levels

- Non-reactive shade level: 3 – suitable for grinding applications
- Manually activated shade levels: 8-13
- Automatically activated shade levels: 4-13

Included as standard: Welding helmet, Optrel IsoFit® Headgear, bag, micro USB cable, front cover lens.
